

# RADIATOR OF NEW ENERGY TRUCK

## 新能源卡车散热器

### 功能

- 1. 结构优异,满足不同车型需求;
- 2. 根据整车的温度需求,结合温度传感器提供的温度,整车控制系统智能调节无刷电子风扇的转速,达到高效节能,强劲散热;
- 3. 管带式铝制水箱,结构紧凑轻量化;节能环保的同时有效的提高了水路系统零部件的使用寿命;
- 4. 框架组件优质选材,坚实可靠。

### FUNCTION

- 1. Excellent structure to meet the needs of different models;
- 2. According to the temperature requirements of the vehicle, combined with the temperature provided by the temperature sensor, the vehicle control system intelligently adjusts the speed of the brushless electronic fan, to achieve high efficiency and energy saving, strong heat dissipation;
- 3. Tubular belt type aluminum water tank, compact structure and lightweight; Energy saving and environmental protection at the same time effectively improve the service life of parts of the waterway system;
- 4. High-quality material selection of frame components is solid and reliable.

适用机型 Applicable Machine	风扇 Fan	膨胀水箱 Expansion tank	换热芯体尺寸 Core size(cm)
新能源卡车 New Energy Truck	无刷电子风扇 Brushless Electronic Fan	建议增加 Recommended	1800×1200×160 最大尺寸 Max size of the core

► Can be customized or customized according to customer requirement.  
可根据客户需求选配或定制。

### 关键零部件

1. 无刷电子风扇
2. 导风罩组件
3. 框架组件
4. 散热器
5. 防尘网

### KEY COMPONENTS

1. Brushless electronic fan
2. Air hood assembly
3. Frame components
4. Radiator
5. Dust-proof net
